## PERSONAL PROJECTS

AI Face and Mask Detection with web Integration : Developed a facial recognition project integrating AI for backend processing and React JavaScript for the frontend. Utilized machine learning algorithms to detect and recognize faces, comparing a single image against a dataset of 50000 images. The application accurately identifies and displays matching images on the frontend, showcasing robust and efficient facial recognition capabilities. (Technologies Used - Frontend - React Js, Tailwind Css Backend - Python, Node js, Express Js Database - MongoDB)

Medical expenses management system using technologies like AI/ML where all the processes is done using DEVOPS and stored over cloud.
